

Paramedic Doffing Training Checklist

Suspected/Confirmed EVD Cases and/or Care Environment Coverall/Gown with Separate Hood and Foot Covers

This checklist is designed to assist with training paramedics and first responders on the correct doffing of personal protective equipment (PPE) for suspect/confirmed cases of EVD and their care environment. **Please Note: This is a sample checklist** that may need to be adapted to meet relevant standards of practice and/or specific manufacturer's user instructions for variations of approved PPE. The tool can be used to verify and document that all necessary doffing steps are performed and in the proper sequence. Any errors or omissions identified during practice and skill proficiency demonstrations must be communicated immediately, to ensure specific instructions are provided and so appropriate corrective action are taken for the protection of the paramedic and/or first responder.

Note: Hand hygiene should be performed after removing PPE, before hands approach the face and any time hand contamination is identified or suspected during the doffing

Before you begin, instruct paramedic(s) and/or first responder(s) that PPE must be removed slowly and carefully. Ensure the correct sequence is followed to avoid self- and cross-contamination of the workplace.

TRAIN.	PRAC.	PROF.	DOFFING PPE PROCEDURE	COMMENTS (May include size of PPE)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Remove outer gloves: <ul style="list-style-type: none"> <input type="checkbox"/> Remove outer gloves taking care not to touch inner gloves or bare skin <input type="checkbox"/> Dispose into designated waste container <input type="checkbox"/> Inspect inner gloves for visible contamination, cuts or tears 	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Remove face protection: <ul style="list-style-type: none"> <input type="checkbox"/> Hold face shield by grasping band at back of head, lifting gently over head and away from face <input type="checkbox"/> Dispose into designated waste container 	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Remove hood cover: <ul style="list-style-type: none"> <input type="checkbox"/> Trained observer may assist with removal, but must be donned in adequate PPE based on risk <input type="checkbox"/> Remove hood cover without self contamination <input type="checkbox"/> Dispose into designated waste container 	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Remove coverall/gown: <ul style="list-style-type: none"> <input type="checkbox"/> Trained observer may assist, but must be donned in adequate PPE based on risk <input type="checkbox"/> Unzip or unfasten coverall/gown completely before rolling down and turning inside out. Avoid contact of inner clothing with outer surface of coverall during removal, touching inside of the coverall/gown only <input type="checkbox"/> Take care not to slip and fall; sit on chair as needed <input type="checkbox"/> Dispose into designated waste container 	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Remove foot covers: <ul style="list-style-type: none"> <input type="checkbox"/> Remove foot covers carefully to avoid inadvertent contact and/or cross-contamination <input type="checkbox"/> Take care not to slip and fall; sit on chair as needed <input type="checkbox"/> Dispose into designated waste container
